DETAILED ACTION

1. All outstanding rejections are overcome by applicants' after-final amendment filed 7/27/07 which has been entered.

In light of the new grounds of rejection set forth below, the finality of the previous office action has been withdrawn and thus, the following action is non-final.

It is noted that in the interest of "compact prosecution", the examiner contacted applicants' attorney Mr. Stobbs in order to suggest an examiner's amendment to the claims that would overcome the claim objection and claim rejection as set forth below. However, in light of the after-final status of the application and thus, the examiner's time requirement for applicants' response to such proposed amendments, applicants' attorney stated that a decision regarding the examiner's proposal could not be made to meet examiner's time requirement and therefore, the following office action is set forth.

Claim Objections

2. Claim 12 is objected to because of the following informalities:

In line 12, it is advised that "missing" is changed to "mixing" in order to correct a typing error.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1, 4-5, 7-9, and 12-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 and claim 12 each recite in the pH adjusting step "adjusting said solution to a given pH range". The scope of each of the claims is confusing given that it is not clear what is meant by "given pH range" or what values of pH this phrase encompasses.

In order to overcome the above rejection, it is suggested that the limitation of claim 9 be inserted into claim 1 and the limitation of claim 17 be inserted into claim 12 (and thus, canceling claims 9 and 17) so that above cited phrase in each claim is amended to recite "adjusting said solution to a pH range of 8 to 11".
